WEATHER OF CONCERN

Weather of Concern

Northern California:

- Smoke will help to keep daytime temperatures cooler the next couple of days. Then a gradual decrease in high temperatures mid-week returning to near average.
- High pressure will remain over the region for the next several days with above normal temperatures and a small threat of thunderstorms over the Sierra Nevada and Kern County Mountains and Deserts.

Southern California:

- High pressure will continue to bring above normal temperatures into Sunday.
- There is a very slight chance of showers and thunderstorms in the San Gabriel Mountains this evening.

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

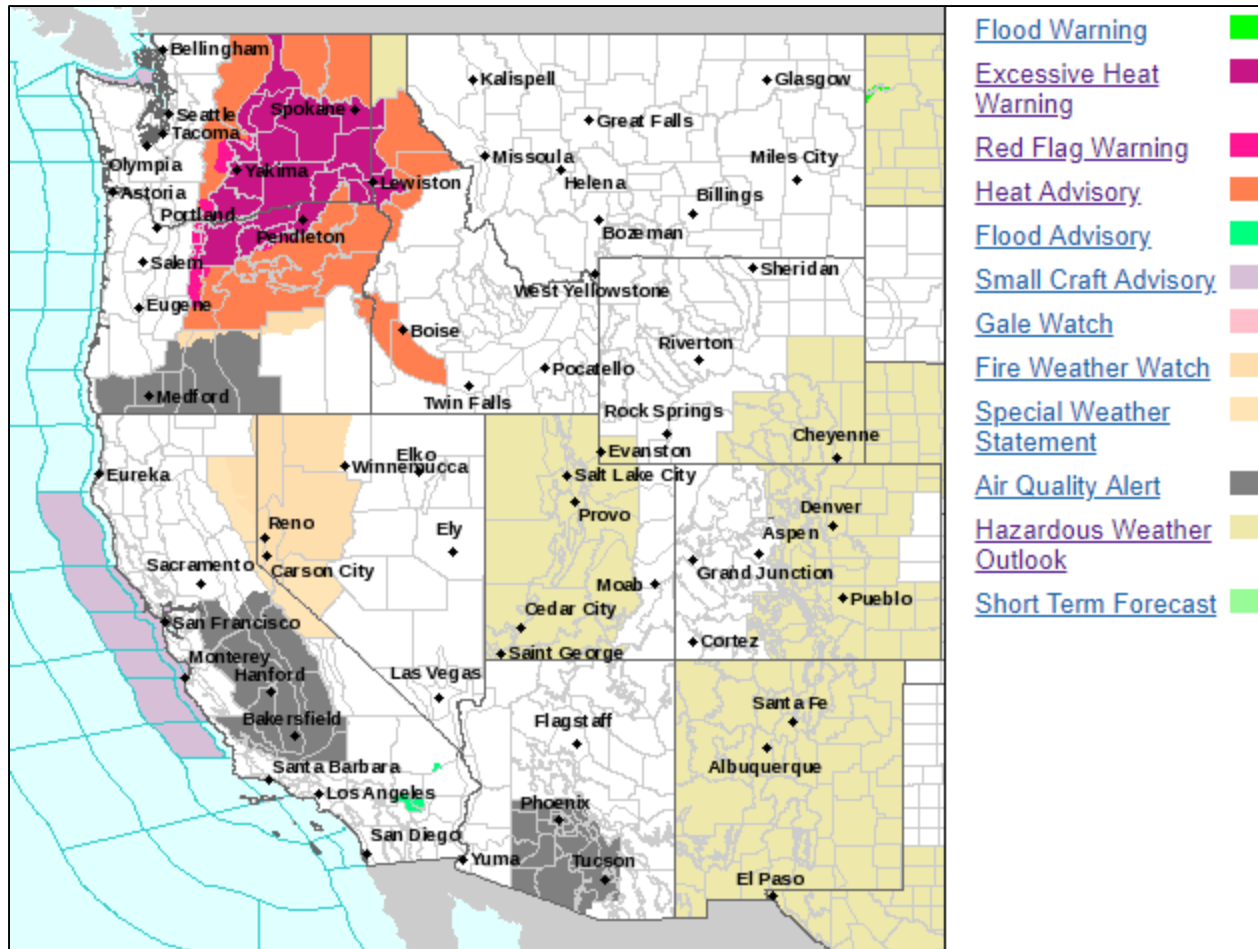

Widespread smoke from wildfires will continue to moderate temperatures through the week with afternoon highs remaining slightly above normal. Daytime humidities remain low with moderate to poor overnight recoveries in the foothills and mountains. Locally gusty wind in the Coastal Range afternoons and overnight when combined with low humidity will result in local areas of critical fire weather conditions. Locally gusty afternoon/evening winds over the Sierra Wednesday into Friday could bring critical conditions at times. Gusty northwest winds are expected once again today along the coast and in southern Mendocino County. These are also expected along the Trinity River and Klamath River valleys this afternoon and evening. Gusts to 25 mph are likely. Cooler temperatures are forecast for the coming weekend.

SOUTHERN CALIFORNIA

High pressure will continue to bring above normal temperatures through the week. There will be widely scattered showers and isolated thunderstorms across western Riverside and southwestern San Bernardino Counties around sunrise this morning. Beyond that, there will continue to be the possibility of isolated afternoon and early evening thunderstorms across the mountains and high desert areas through Wednesday.
